

## Open workshop day on the 29th of April

Welcome to Sideways Engineering AB's open workshop day on April 29th 13.00 CET.

We will present our company and all ongoing projects including newly built Austin-Healey race cars ready for 2017 season.

## New products!

### **Sideways engine complete**

We offer complete engines from standard road going to full-on competition engines. Prices, depending on condition and scope, varies between 50 000 - 250 000 SEK incl. VAT

### **Sideways steel crankshaft to homologated 22.9 kg weight**

Uniquely manufactured and it is the lightest crankshaft on the market. It is fully counterbalanced and nitrided for strength. The low weight and inertia helps the engine revving up and down quicker and improves acceleration. 35 000 SEK incl. VAT

## New Products!

### Sideways gearbox complete for road, rally or racing

Gearboxes for any type of application - from standard road going to full on competition. We appreciate if you bring an exchange or donor gearbox.

Prices starts at 18 750 SEK incl. VAT

### Sideways Weber throttle linkage kit RHD - twin wires installed in a new race car

Unique kit especially designed for Healeys. Gives you a much better pedal feel and accuracy. We are only using CNC machined and laser cut parts. No compromise on rod-ends or wire quality. Twin wires for the serious competitor! 7 775 SEK incl. VAT

## New Products!

### **Sideways 45 litres and 105 litres fuel tank - FIA eligible**

Eligible for FIA Appendix K racing. Designed for best fit and function in a Healey with twin pick ups and a special sump to prevent fuel shortage. Note! Fuel consumption for a full race Healey is maximum 1litre/min during race.

Price 6 250 SEK incl. VAT

### **Sideways fuel distribution block 3 -1 (AN6)**

A unique product for us that will allow equal length fuel lines to the carburettors. This evens the flow and pressure and minimises differences between carburettor performance. We recomend to mount it on left side footwell in the engine compartment.

Price 490 SEK incl. VAT
