

Pole and podium at Velodromloppet

After the success at Anderstorp the team headed for the second race of the championship at Karlskoga Motorstadion at Gelleråsen.

Heavy rain during qualifying resulted in pole position by 1,5 second beating a Jaguar E-type and a Ford GT40 among others. "It was very slippery and plenty of aquaplaning. Challenging!" commented the teams driver Anders.

Anders made a great start of the race in the drying conditions but very soon realised that the front brakes were not working. After four laps and having lost the lead the Healey entered the pits...

The Healeys did well in wet qualifying conditions.

For race two on Sunday the brake problem was solved and Anders started the race from 5th on the grid.

The chase for the leading Jaguar began and the Healey was up to second after less than two laps.

At the end of the race the gap had closed and the track was almost completely dry.

“I did everything I could but a patch of water at the start of the straight caught me...” and resulted in a big spin ending in the gravel.

“Anders managed to get the car going again and still secured 2nd place and fastest lap of the race when the flag dropped” – says team manager for the weekend Erik Rydåker-Lindberg.
